A NOTE ON THE EVIDENCE BASE

The PQNK knowledge library, more than two hundred Knowledge Papers, field guides, and crop protocols, is published openly at pedaver.com. The founding peer-reviewed rice publication is: Sharif, A. et al. (2011). “Moist Soil Raised Bed Rice Production in Pakistan.” International Rice Journal.

All PQNK results come from operational farms under real production conditions, not from research-station small plots. The field record is open: farmers’ own results, with photographs and videos, are published in the Knowledge Exchange at pedaver.com/field-evidence.
